ABOUT ME

First-year student pursuing Computer Science & Engineering (AI/ML) at JK Lakshmipat University alongside a BBA in Digital Business & Entrepreneurship at IIM Bangalore. Interested in technology, software development, finance, entrepreneurship and emerging technologies. Curious about how technology and business shape the world, with an interdisciplinary approach to exploring ideas and understanding problems.

EDUCATION

BBA, Digital Business & Entrepreneurship (DBE) **2026 - Present**
Indian Institute of Management Bangalore

B.Tech, Computer Science & Engineering (AI/ML) **Oct 2026 - Present**
JK Lakshmipat University, Jaipur

CASE COMPETITIONS

Green Energy GCC Consulting | BreakTheCase'26, BITS Hyderabad Consulting Group **2026**
- Applied Six Sigma DMAIC to invoice-processing defects (58 fields, ~16.7K invoices): set a 3.80 sigma baseline from 990 errors in 1,603 audited invoices, and used Pareto and fishbone analysis to trace 94.9% of errors to vendor submission.
- Proposed automated submission gates (PO match, mandatory fields, attachment and duplicate checks)
- Estimated monthly error cost at ₹9.33 lakh falling to ₹0.36 lakh on team assumptions, with a control plan and sensitivity analysis.

DigiYatra Commercial Expansion | CDPG National Student Case Challenge, IIM Bangalore **2026**
- Track 3 (Governance & Ecosystem Management): designed a token-based framework with single-use, purpose-bound tokens, a six-stage partner lifecycle from registration to revocation, and the DigiYatra Foundation as sole regulator.
- Added citizen-control safeguards (consent, visibility, erasure, opt-out without losing core travel services) and open-standards interoperability.

The Hype Economy | Viral marketing case study **2026**
- Analysed six viral products (Labubu, Stanley, Prime, Dubai chocolate, Crocs, fidget spinners) to build a hype playbook (scarcity, social proof, FOMO, identity) and a test for when hype becomes a lasting brand versus a fad.

TECHNICAL PROJECTS

Vcare.life (formerly Swasth+) | Patient-controlled healthcare platform **NYC CodeQuest 2026, Round 3**
- Unified records, prescriptions, appointments and doctor sharing with an AI health companion; offline-first design with cached records, local fallback and queued sync.

PRAMAN | Zero Trust security middleware **NYC CodeQuest 2026, Round 2**
- Plug-and-play middleware verifying every request via HMAC signature, timestamp, replay protection and constant-time checks; integrates with Express and Flask in two lines.

ANĒK | Civic action platform **NYC CodeQuest 2026, Round 1**
- Platform to report, vote on and track local issues with a Good Citizen rewards system; shaped the problem definition and user experience and coordinated a four-person team.

TwentyFour | Productivity web app **CodeStorm 2026**
- 24-hour timeline, focus mode, coin economy and reward store; React, TypeScript, Tailwind, Node.js, Express, Prisma, Supabase.

JKLU Resource Archive | Student resource web app **JK Lakshmipat University**
- Built a web archive that brings JKLU study resources into one place, so students can find materials without asking around.

SKILLS

Languages & Web: Python, JavaScript, TypeScript, HTML5, CSS
Frameworks & Backend: React, Tailwind CSS, Node.js, Express, Flask
Data & Deployment: Supabase, Prisma, Vercel
Security & AI: Zero Trust verification, cybersecurity and OSINT (foundation), agentic AI
Business & Analytics: Six Sigma (DMAIC), Pareto and root-cause analysis, cost and sensitivity modelling, governance design
Product & Strategy: Product development, consumer and brand strategy, project management

CERTIFICATIONS & ACHIEVEMENTS

NYC CodeQuest 2026 Finalist | Not Your College **Sep 2026**
- Finalist and Top 5 of 82 teams across three build rounds with Team Elite Debuggers.

Agentic AI Workshop | World Technocon x E-Cell MNIT Jaipur **Oct 2026**
- Completed a 7-hour hands-on program on agentic AI, covering agentic workflows and multi-agent coordination.

Foundation Certificate in Cyber Security and OSINT | Sherlock Institute of Forensic Science **Apr 2026**
- Two-month foundation course in cybersecurity and open-source intelligence, focused on how digital crime actually works.
